READ THIS FIRST (guidance page: remove before filing)

Prepared for: DEMO 1/2026, Demo Court, Bengaluru, DEMO: Asha v. Ravi (security deposit). Not real evidence. Generated on 04/11/2026 00:31:28 IST with Saboot 0.3.0.

- Saboot is a software tool. It is not a lawyer and it is not the "expert" referred to in section 63(4) of the Bharatiya Sakshya Adhiniyam, 2023. Nothing in this bundle is legal advice. Have a practising advocate review every page before it is filed.
- PART A is for you, the person in charge of the device. Check every filled value (shown in blue) against the device, then sign in ink and write the date and the time (IST, 24-hour) at which you sign.
- PART B must be completed and signed by an expert. The pre-filled PART B is only a draft to save the expert time: the expert must independently examine the records and recompute each hash value. A blank PART B and a worksheet are included for this.
- Who can sign PART B is not settled. On 22 May 2026 the Supreme Court (Pune Bar Association v. Union of India, W.P.(C) No. 599 of 2026) kept this question of law open. It observed that, besides an Examiner of Electronic Evidence notified under section 79A of the IT Act, 2000, a person may possibly sign if the court is satisfied, on unimpeachable material, of their special skill and expertise in computer science and cyber forensics. Ask your advocate whom to approach.
- File exactly the files listed in the Hash Report. Re-exporting a chat, forwarding a photo on WhatsApp, renaming inside a zip, compressing or editing a file produces a different hash value. Keep the originals unchanged and copy them by cable, not by messaging apps.
- The Hash Report (Annexure H) must be enclosed with the certificate. Anyone can check a file against it by scanning a QR code (the check runs in their browser; nothing is uploaded) or with standard tools listed in the Hash Report.
- The custody log (Annexure C) is a record you kept on your own device. Each entry is chained to the previous one by its SHA-256 value, so later edits are detectable, but it is still your own record, not an independent one.

What is in this bundle

- Certificate PART A and draft PART B for: Asha's phone (demo)
- Blank PART B for the expert to complete by hand
- Annexure H: Hash Report for 4 records
- Expert's verification worksheet
- Annexure C: custody log

Demo Court, Bengaluru
Case No.: DEMO 1/2026
DEMO: Asha v. Ravi (security deposit). Not real evidence

THE SCHEDULE

[See section 63(4)(c)]

CERTIFICATE

PART A

(To be filled by the Party)

I, **Asha (demo)** (Name), Son/daughter/spouse of **Example Parent (demo)** residing/employed at **Example Street, Bengaluru (demo address)** do hereby solemnly affirm and sincerely state and submit as follows:—

I have produced electronic record/output of the digital record taken from the following device/digital record source (tick mark):—

☐ Computer / Storage Media ☐ DVR ☑ Mobile ☐ Flash Drive ☐ CD/DVD ☐ Server ☐ Cloud ☐ Other

Other: _____

Make & Model: **Example Phone X1 (demo)** Color: **Blue**

Serial Number: **X1-2026-000184**

IMEI/UIN/UID/MAC/Cloud ID **IMEI (SIM 1, example number, not a real phone): 490154203237518; MAC (Wi-Fi, documentation address, not a real device): 00:00:5E:00:53:01** (as applicable)

and any other relevant information, if any, about the device/digital record **Demo device for trying Saboot. Not a real phone. Electronic records produced from this source: R-1, R-2, R-3, R-4. Each record, the manner in which it was produced, its size and hash values are set out in the enclosed Hash Report (Annexure H).** (specify).

The digital device or the digital record source was under the lawful control for regularly creating, storing or processing information for the purposes of carrying out regular activities and during this period, the computer or the communication device was working properly and the relevant information was regularly fed into the computer during the ordinary course of business. If the computer/digital device at any point of time was not working properly or out of operation, then it has not affected the electronic/digital record or its accuracy. The digital device or the source of the digital record is:—

☑ Owned ☐ Maintained ☐ Managed ☑ Operated

by me (select as applicable).

I state that the HASH value/s of the electronic/digital record/s is **as stated against each record in the table below and in the enclosed Hash Report (Annexure H)**, obtained through the following algorithm:—

☐ SHA1: ☑ SHA256: ☐ MD5: ☐ Other _____ (Legally acceptable standard)

Record	File	Size (bytes)	Hash value/s
R-1	Screenshot_20261006-100700_WhatsApp (demo).png	69	SHA256: cf04917b681aea9e6c74e25f235877a5c65b5d6d59cc2824362dc55fd75930a4
R-2	WhatsApp Chat with Ravi (demo).zip	1,003	SHA256: b658a1fad202a8db5dafd5669624f3e8ea46e0d0428cceed735d801042a90a6e
R-3	WhatsApp Chat with Ravi (demo).txt	1,204	SHA256: a7c0f1e70ca65c0e61c48ae0f36ac2fb55d5c1c360c593c42aeb72a4c63b498c
R-4	IMG-20261005-WA0004.jpg	69	SHA256: cf04917b681aea9e6c74e25f235877a5c65b5d6d59cc2824362dc55fd75930a4

(Hash report to be enclosed with the certificate)

_____

(Name and signature)
Asha (demo)

Date (DD/MM/YYYY): _____
Time (IST): _____ hours (In 24 hours format)
Place: **Bengaluru**

DRAFT, NOT AN EXPERT OPINION. The party prepared this draft with Saboot, a software tool, for the expert's convenience. The expert must independently examine the device or records and recompute every hash value. This draft is not for signature: the expert signs the blank PART B in this bundle, or their own clean copy, after verifying everything.

Demo Court, Bengaluru

Time (IST): _____ hours (In 24 hours format)

Place: _____

ANNEXURE H: HASH REPORT

(enclosed with the certificate under section 63(4)(c) of the Bharatiya Sakshya Adhiniyam, 2023)

Each record below was read in full on the party's own device and hashed with MD5, SHA-1 and SHA-256 in a single pass (Saboot 0.3.0; Rust md-5/sha1/sha2 implementations compiled to WebAssembly). A hash value changes completely if even one bit of the file changes. Sizes are exact byte counts. "Modified" times are as reported by the operating system or stored inside the zip and may reflect copying rather than creation.

Independent check: Windows: `certutil -hashfile <file> SHA256` macOS: `shasum -a 256 <file>` Linux: `sha256sum <file>` Browser (offline, nothing uploaded): http://localhost:4791/verify.html

Records from: Asha's phone (demo)

Scan to check records R-1, R-2, R-3, R-4

Opens a page that hashes the file on the scanning device. Files are never uploaded.
