TRANSCRIPT OF WHATSAPP CHAT EXPORT

DEMO 1/2026, Demo Court, Bengaluru, DEMO: Asha v. Ravi (security deposit). Not real evidence

Item	Value
Chat file	R-3: WhatsApp Chat with Ravi (demo).txt
Chat file size	1,204 bytes (1.18 KB)
Chat file SHA-256	a7c0f1e70ca65c0e61c48ae0f36ac2fb55d5c1c360c593c42aeb72a4c63b498c
Export archive	R-2: WhatsApp Chat with Ravi (demo).zip, 1,003 bytes
Archive SHA-256	b658a1fad202a8db5dafd5669624f3e8ea46e0d0428cceed735d801042a90a6e
Exported from	WhatsApp on Android (Android format)
Messages	11 in the export; 11 shown in this transcript
Period covered	2026-10-01 09:00:00 to 2026-10-06 10:06:00 (phone's local time)
Participants	Asha (demo) (5), Ravi (demo) (5)
Date order used	day/month/year: ambiguous in this file (all numbers 12 or below); assumed day/month, the usual Indian setting
Message boundaries	by date/time header lines (see limitations)
Generated	04/11/2026 00:31:29 IST with Saboot 0.3.0

How each message can be checked

Every message below shows a byte range [start–end) in the chat file and the SHA-256 of exactly those bytes, including the line ending. In the full export the ranges run back to back from byte 0 to byte 1204 (the end of the file). To check one message, hash that slice of the original chat file, for example: `python -c "import hashlib;b=open('_chat.txt','rb').read();print(hashlib.sha256(b[START:END]).hexdigest())"`

Limitations

- Message boundaries were found by matching date/time headers. A message that itself contains a line shaped like a WhatsApp header cannot be told apart from a separate message, so authorship of such lines should be checked against the phone.
- Times are the phone's local time as written in the export; the export does not record a time zone.
- Disappearing and view-once messages, and messages deleted before export, are not in the export.
- Each message hash identifies this particular export file. Exporting the same chat again can produce different bytes.
- The day/month order of dates could not be confirmed (ambiguous in this file (all numbers 12 or below); assumed day/month, the usual Indian setting). Check one message's date on the phone.

Characters that cannot be printed (such as emoji) are shown as their Unicode code point, e.g. [U+1F44D]. Hashes always cover the original characters.

#	Date, time (as written)	Sender	Message, attachments and message hash
